● COWS ABDUCTED

Butchered by aliens

Thousands of cows were mutilated in UFOs and thrown back down to Earth by aliens during the 1970s, newly declassified FBI files claim.

The bureau said more than 8000 cows were abducted before being brutally sacrificed and thrown out of spacecraft over the southern US - sending the White House into a panic.

The memo is one of thousands of files that the FBI has made public for the first time in a new online resource called The Vault.

It details how the aliens took body part trophies from the cows and in some cases drained the animals entirely of their blood.

One FBI investigator's theory was "these animals are picked up by aircraft, mutilated else-

where and returned and dropped from aircraft. Identical mutilations have been taking place all over the southwest. Whoever is responsible is well organised with boundless technology, financing and secrecy."

News of the cow abductions reached the White House in 1979. Then US Attorney-General Griffin Bell wrote to Senator Harrison Schmitt, saying they "indicate one of the strangest phenomena in my memory".

Schmitt represented New Mexico, where countless incidents were reported at a ranch in Dulce, in the north of the state.

In one case, an 11-month-old bull was dropped close to a house from an aircraft with its sex organs removed.
