## ● ALIEN DENIAL

# No joy for ET believers

The White House says there is no evidence of aliens making their presence known on Earth.

After receiving a petition asking for a formal acknowledgment of "an extraterrestrial presence engaging the human race", a White House official responded by saying the US Government had no evidence of extraterrestrial life or that aliens had contacted any human being.

He also said there was no credible evidence to suggest proof of extraterrestrial life or contact was being hidden from the public.
