

● POORLY COWS

Not aliens, but cruelty

A CANADIAN farmer who has lost at least 250 cows in the past 10 years is blaming aliens.

Werner Bock has posted YouTube videos detailing his cows' malnourished appearance, sunken features and hair loss.

Bock declared his cows were victims of "death rays", an alien weapon being covered up by the Royal Canadian Mounted Police.

He claimed "atmospheric air is manipulated into a death beam, focused on the (animal's) noses".

But authorities have charged Bock with cruelty to animals and he will go on trial in September.
