# A 'thing' in the sky— new report

Unidentified flying objects, flying saucers, call them what you like, but several people have reported seeing a "thing" in the sky over Newport in the past week.

The latest report comes from two 13-year-old boys who claim they saw a cone-shaped object in the sky when they were playing near their homes at Woodland Road on Wednesday evening.

"It was a silver cone-shaped object in the sky going in a straight line; it went into the distance and just disappeared," said Lewis Trickey, of Orchard Street.

"I am certain it was not an aeroplane because there was no vapour trail, and it was still light at the time."

Lewis and his friend, Jeffrey Lane, of Woodland Road, will be keeping a close look-out for the object if it reappears.
