## Men see 'spinning saucers' in sky

3404  
Two Norfolk men have reported seeing strange objects shaped like saucers in the sky.

The men, Mr. Herbert Elliott, of Great Yarmouth, and Mr. Victor Lock, of Little Ormesby, near Great Yarmouth, saw the UFOS while at a rubbish dump outside the town yesterday.

Mr. Elliott, aged 32, said, "I looked into the sky and saw two objects travelling north and descending rapidly. Then they went up fast and disappeared in the clouds.

"They were spinning rapidly and were like a saucer in shape and light grey in colour. They were miles high when I first saw them."

### Great height

A few minutes later, said Mr. Elliott, he saw aircraft travelling across the sky much lower than he had seen the objects and much slower. They were not the round shape objects he had seen previously.

He said, "At about 2.55 p.m. I again saw a round grey object in the sky at about the same height as the ones I'd seen previously. This one had a flashing red light and was flying at a great height. It disappeared in the clouds."

Mr. Elliott said he was certain that what he saw were not aircraft, helicopters or balloons.
