

# More UFOs spotted LM by children

REPORTS OF new sightings in the Broad Haven area have backed up claims by several schoolchildren that a UFO landed in a field near their Dyfed school last week.

One the same day as they reported seeing the object in a field 300 yards from their school, a woman living in the same village claimed to have seen several bright lights in the sky.

And a group of 20 other schoolchildren at Hubberston, Milford Haven, have reported seeing a cigar-shaped object in the sky above the town.

The latest sightings have been reported to the South Wales co-ordinator for the British Unidentified Flying Objects Research Association, Mr. Randall Jones Pugh, of Roch, near Haverfordwest, who said last night that he now believed that the Broad Haven children had seen a UFO.

"The 20 children at Hubberston were having their lunch break when they saw a cigar-shaped object quite high in the sky," he said.

**"Well, have you come to apologise for the lies you told about what you saw in the field, then?"**

"Apparently it was silver in colour and they saw it for three or four minutes before it disappeared into a cloud." He said that the woman in Broad Haven who saw the bright lights was very perturbed about it.
