

dry when a valve on the water main from the Carno reservoir above Ebbw Vale "disintegrated".
South Wales
Colliery workers coming off their shift at Marine colliery, Gwm looking forward to a refreshing shower had to remain black-faced. The water authority promptly reacted by sending a mobile tanker to the *works*

And the next object is . . . a mystery

A BRIGHTLY coloured moving mystery object in the Gwent skies had bewildered both police and local residents.

The UFO — described as bright red and green with bands of light splaying outwards from a central point — was spotted hovering over Markham.

For two hours Mr David Edwards, of Coed-y-Brain House, Aberbargoed, together with family, neighbours and police called to the scene watched the object.

"It hovered for quite a while very high up and then shot off very fast," said Mr Edwards.

He telephoned Rhoose Airport who said that they knew of no aircraft in the area when the mystery object was spotted between 11.30pm and 1.30am.

"There was one central object with bits shooting from it," said Mr Edwards.

"I was watching with binoculars. About six people must have seen it altogether. I would never have believed it if I hadn't seen it with my own eyes.

Inspector Graham George of Bargoed police confirmed that one of his men had watched the object. Its origins were a mystery, he said.
