Now it is orange UFOs

ONLY WEEKS after reports of little green spacemen in Hungary, meteorologists say they have sighted four large, bright orange-coloured unidentified flying objects (UFOs).

Meteorologist Gyula Bazso yesterday said the objects were spherical and 50 yards across. He said one flew at a speed of 2,625 mph.

Bazso said he contacted the local military airbase which sent up an experienced pilot who located four objects at a height of around four miles. All the UFOs, which he said were bright orange in colour, disappeared suddenly shortly after 2 a.m. on Saturday.
