Soviets confirm alien landing

SOVIET SCIENTISTS have confirmed the landing of an alien spaceship manned by giant people with tiny heads, the official Soviet news agency Tass said yesterday.

Three aliens, accompanied by a small robot, went for a midnight stroll in the Soviet city of Voronezh.

Western Mail Reporter

"Scientists have confirmed that a UFO recently landed in a park in the Russian city of Voronezh," Tass said.

"They have also identified the landing site."

A large shining ball or disk was seen hovering over the park by

Voronezh residents.

According to residents, the UFO landed and up to three creatures about 12 to 13 feet high with very small heads emerged, accompanied by a small robot.

Asked whether the latest report could possibly be a hoax, a Tass spokesman said: "Tass never jokes. If we start joking we'll stop existing."
