Dozens witness UFOs

DOZENS OF claims that Unidentified Flying Objects had been seen near the Belgian-Netherlands-West German border were yesterday being investigated by the Belgian air force

In the last 10 days both civilians and police in the north-east of the country have reported luminous objects in the sky, some describing a flying platform scanning the surface with three huge searchlights, others talking about objects performing a ballet

During the same period air controllers "found radar blips on their screens that could not be immediately explained," defence ministry spokesman Col Michel Mandel said yesterday.

"We are looking for a rational explanation," he added.
