That's no
UFO — it's
just Venus

Was it a bird, was it a plane, was it a UFO?
No, say the experts, it was Venus.

The Argus reported yesterday that two
separate video recordings had been taken of
a mysterious object in the skies above

Curiouser and curiouser

■ I WAS amazed after reading your article regarding the recent UFO sighting over Cwmbran to come across a similar article in the Today newspaper which claimed the UFO was a passing Russian spaceship and not Venus as claimed by the South Wales Argus.

My question is who is right?

Or is it a case of was it really a UFO!!
