Why the aliens landed in a field

HAD aliens landed? Across the night sky, approximately a mile and a half northwest of Caerphilly, a sinister, bright white glow lit the night sky.

It stayed put at Penyrheol: didn't move at all.

South Wales police received calls from worried residents. An officer was sent to the scene.

The inspector breathed a sigh of relief as the report came in.

"I am in a field surrounded by cows. I believe it is S4C filming."
