## Dan O'Neill's no <sup>2374</sup>expert, either

I REFER to Dan O'Neill's sarcastic comments concerning UFOs (Personally Speaking, Echo, April 4).

Dan O'Neill is just another person who cannot face up to the fact that humans do not know everything there is to know about the world we live in.

Some UFO stories may be hoaxes/weather balloons, etc, but there are still some that are unexplainable.

Men have always been inventing stories to explain things they did not understand. What makes Dan O'Neill's explanation any better than these?
