UFOs spotted

FOUR aircraft flying over north-east China at around the same time spotted one or more UFOs.

The captain of a Northern Airlines flight from Harbin to Beijing radioed in the first report at 5.45pm on December 4.

He saw a white, oval UFO travelling about 15 kilometres a minute (550 mph) near his flight path, said a Chinese news report.

The captain of another civil airliner radioed in to report seeing the same thing, while two other airplanes spotted red or yellow objects.
