

Distress after UFO abduction

SIR - Thank you for the article on UFO's in the Weekly News last week and I would like to rectify a misunderstanding as this could cause distress to the quite sincere and sensible people in North Wales who have come to me in the aftermath trauma of an abduction experience from a UFO.

It would seem that alien beings do temporarily kidnap human beings into their crafts for what seems like genetic engineering. These cases are coming more and more to light in Britain in the 1990's.

In the absence of the medical professions, my colleagues and I have had to take on the roll of counsellors. We are not psychologists or doctors, but we do have some colleagues who are psychiatric nurses and a few psychologists.

However, in the main it is better to have an untrained sympathetic ear, than none at all.

I did say I did not think it was possible to contact 'channels' into alien intelligences in some distant galaxy. There are pockets of people, including in Colwyn Bay, who meet and believe they can 'channel', they are generally tied into the medium/spiritualist world.

I am afraid my credulity level stops there.
