

# Strange lights seen in the sky

Pete Thomas

STORMS may be dominating the daily conversation but in between all the havoc there has been another Swansea UFO sighting.

Earlier this month a number of people rang the Evening Post after spying strange objects in the sky on the same night as a meteor shower.

Last weekend there was another sighting, this time by Sarah Llewellyn, of Clos Tyr Ffordd in Penllergaer, on the outskirts of Swansea.

"It was 12.30am on Saturday," she said.

"My parents came back after being out and I went outside to see them. Up in the sky we saw a round object with a green middle. There was a green light going round and round.

"It made no noise and was still. It was huge. I saw it for five to 10 minutes before I went inside."
