

MoD to unveil 'Welsh Roswell' information

DETAILS of a 1974 UFO incident in which aliens are said to have "crashed" into remote Welsh mountains are to be made public by the Ministry of Defence.

The so-called "Welsh Roswell" will be among dozens of UFO files released in a new MoD archive.

The MoD says it is using up so much time dealing with Freedom of Information Act requests about UFOs it is to publish details of incidents going back to the 1960s.

The Berwyn Mountains Incident happened on a frosty night in January 1974, near Llandrillo, in the remote Berwyn Mountains.
