

Riddle of some Merc-ky goings-on in the night sky

MYSTERIOUS lights have been spotted in the night sky above Penarth.

The trio of bright-orange lights were spotted by Echo reader Martin Sells on Boxing Day at 6.45pm.

The lights, which formed a

pattern like the Mercedes Benz logo, without the circle, were visible for about three minutes.

Mr Sells, who lives in Sundew Close, Penarth, said they reappeared in the sky 10 minutes later.

He told the Echo: "They were bright orange in colour and travelling reasonably close together and there was no sound.

"They travelled across the sky towards Cardiff reasonably slowly and then the

second light started to fade and then disappeared.

"Then 10 minutes later they appeared again in the same position..."

South Wales Police said it had received no reports of unusual lights in the sky.
