### **"ABDUCTION: HUMAN ENCOUNTERS WITH ALIENS"**

---

By John E. Mack, M.D. (3 hours, abridged, Simon & Schuster, \$17) *25HP*

---

In a time when some people still think the world is flat, John E. Mack must have done some soul-searching before deciding to write this book. The author had more than a reputation to lose, because not only is he the author of the Pulitzer Prize-winning biography "A Prince of Our Disorder," he is also a professor of psychiatry at the Harvard Medical School.

In other words, he had to believe what his research had proved. No one needs the ridicule that often goes hand-in-hand with revelations about alien encounters.

The case histories here are drawn from a sampling of 60 individuals who came under Mack's care. They are, he insists, neither crazies nor products of inbreeding. Much of what he learned was revealed to him while the subjects were under hypnosis.

Whether or not the existence of UFOs and alien abductions are taken seriously, the case histories are riveting. What Mack's subjects relate may answer the questions of "Why are the aliens here, what do they want, and why now?" The explanations, if true, are startling.

Simon & Schuster audios may be found in bookstores.
