Galactic trysts

(News note: Dr. John E. Mack, a psychiatrist and Harvard professor, has a new book speculating that millions of Americans may have been temporarily abducted by extraterrestrial beings who used them sexually. Memories of these very close encounters tend to be suppressed but there are certain clues . . .)

Dr. John E. Mack, a Harvard professor,
Serves as a sort of father confessor,
To people who are either tall-taleians,
Or they've made love to little gray aliens.

If you have on your body, mysterious scars,
You might have been had by a pervert from Mars,
Have you lost some time? An unexplained hour?
You may have spent it in a UFO bower.

So search your subconscious and try to recall,
If you've heard this Galactic line at all:
"Oh Eetee DeTee, LukeVader, Artu? . . ."
"It was great for me, was it good for you?"
