

1  
00:00:00,000 --> 00:00:03,830  
Narrator: Hollywood legend Harrison Ford made a

2  
00:00:03,850 --> 00:00:06,390  
special visit to NASA's Ames Research Center

3  
00:00:06,410 --> 00:00:09,290  
to shoot an episode for a new documentary series

4  
00:00:09,310 --> 00:00:11,030  
about climate change called

5  
00:00:11,050 --> 00:00:13,490  
"Years of Living Dangerously."

6  
00:00:13,510 --> 00:00:15,360  
After being greeted by Center Director

7  
00:00:15,380 --> 00:00:18,040  
Pete Worden, Ford was filmed meeting with

8  
00:00:18,060 --> 00:00:20,940  
NASA climate scientists and discussed global

9  
00:00:20,960 --> 00:00:23,260  
temperature prediction data processed using

10  
00:00:23,280 --> 00:00:27,540  
one of the world's fastest supercomputers at Ames.

11  
00:00:27,560 --> 00:00:30,760  
Later he flew in the co-pilot seat in a jet used

12  
00:00:30,780 --> 00:00:33,900  
to gather data for NASA air quality studies.

13  
00:00:33,920 --> 00:00:36,960

Called the Alpha Jet Atmospheric Experiment or

14

00:00:36,980 --> 00:00:40,300

AJAX project, the airplane flies as low as

15

00:00:40,320 --> 00:00:45,830

1,000 feet to sample ozone and greenhouse gas amounts.

16

00:00:45,850 --> 00:00:48,410

After the flight he discussed the implications of

17

00:00:48,430 --> 00:00:50,360

changes in the Earth's atmosphere with

18

00:00:50,380 --> 00:00:52,430

Ames researchers.

19

00:00:52,450 --> 00:00:54,100

The premiere episode of "Years of Living

20

00:00:54,120 --> 00:00:58,570

Dangerously" will air on Showtime on April 13.
