

1
00:00:00,000 --> 00:00:04,010
How is NASA preparing robots for

2
00:00:04,010 --> 00:00:07,700
future space exploration?

3
00:00:07,700 --> 00:00:11,040
A group at NASA Ames develops robots

4
00:00:11,040 --> 00:00:15,060
to work as teammates with humans

5
00:00:15,060 --> 00:00:19,110
Their user interface called VERVE allows

6
00:00:19,110 --> 00:00:23,210
researchers to see from a robot's perspective

7
00:00:23,210 --> 00:00:26,920
Using VERVE astronauts on the Space Station

8
00:00:26,920 --> 00:00:30,300
remotely operated a rover at Ames

9
00:00:30,300 --> 00:00:34,400
A version of VERVE is now being used by Nissan

10
00:00:34,400 --> 00:00:38,490
for its autonomous vehicle systems

11
00:00:38,490 --> 00:00:41,030
In the future robots will be tools and
