

1

00:00:01,000 --> 00:00:05,100

We just made a new discovery about Pluto

2

00:00:07,010 --> 00:00:09,940

A NASA-led study found that a jagged landscape

3

00:00:09,940 --> 00:00:13,910

around Pluto's equator is made of frozen methane

4

00:00:15,720 --> 00:00:18,850

The bizarre landscape resembles a row of knives

5

00:00:18,850 --> 00:00:20,820

with the edges pointing up

6

00:00:22,830 --> 00:00:25,930

The features on Pluto are similar to ice

7

00:00:25,930 --> 00:00:28,290

formations on Earth called penitentes...

8

00:00:30,540 --> 00:00:33,130

But the formations on Pluto can measure

9

00:00:33,130 --> 00:00:34,900

hundreds of feet tall

10

00:00:37,250 --> 00:00:40,000

Researchers used data from the New Horizons

11

00:00:40,000 --> 00:00:43,560

spacecraft to make their discovery
