

1  
00:00:00,000 --> 00:00:04,900

The Kepler space telescope has revolutionized our understanding of our place in the cosmos.

2  
00:00:05,040 --> 00:00:09,550

Through its survey we've discovered thousands of worlds beyond our solar system.

3  
00:00:09,790 --> 00:00:11,130

Thousands!!!

4  
00:00:11,330 --> 00:00:15,480

In fact, we now know there are more planets than stars in our galaxy.

5  
00:00:15,550 --> 00:00:19,550

But after nine years in space, Kepler's journey is coming to an end.

6  
00:00:19,730 --> 00:00:24,850

And before we say farewell to the spacecraft, we want your help to celebrate its legacy.

7  
00:00:24,860 --> 00:00:29,230

By sharing something about what the finding of more planets than stars means to you.

8  
00:00:29,270 --> 00:00:31,000

You can compose a song!

9  
00:00:31,100 --> 00:00:32,050

Draw a picture!

10  
00:00:32,230 --> 00:00:34,080

Write an inspirational message.

11  
00:00:34,300 --> 00:00:35,820

The choice is yours.
