1
00:00:01,020 --> 00:00:06,640
[sound of wind blowing against microphone]

2
00:00:06,640 --> 00:00:09,300
OK...

3
00:00:09,300 --> 00:00:11,620
I think it doesn't read the decimal place.

4
00:00:16,600 --> 00:00:21,180
[faint sound of large aircraft approaching]

5
00:00:21,180 --> 00:00:25,580
[sound of wind blowing against microphone]

6
00:00:25,580 --> 00:00:31,240
[sound of large aircraft approaching]

7
00:00:31,240 --> 00:00:34,720
[sound of wind blowing against microphone]

8
00:00:34,800 --> 00:00:45,200
[distant sound of large aircraft]

9
00:00:45,200 --> 00:01:04,340
[ambient sounds from inside large aircraft]
