

1  
00:00:01,179 --> 00:00:03,860  
NASA Administrator Charlie Bolden

2  
00:00:03,860 --> 00:00:06,100  
visited several of the Agency's field centers

3  
00:00:06,120 --> 00:00:07,900  
in late February among them

4  
00:00:07,900 --> 00:00:09,830  
NASA's Dryden Flight Research Center in

5  
00:00:09,830 --> 00:00:10,980  
Southern California.

6  
00:00:11,700 --> 00:00:13,180  
Bolden was briefed on a variety

7  
00:00:13,180 --> 00:00:14,299  
of current environmental

8  
00:00:14,299 --> 00:00:16,400  
space science and aeronautical research

9  
00:00:16,400 --> 00:00:17,200  
efforts at Dryden.

10  
00:00:17,760 --> 00:00:19,199  
I'll turn it over to Charlie

11  
00:00:19,200 --> 00:00:19,820  
to go over the budget.

12  
00:00:20,060 --> 00:00:22,900  
Detailed the agency's fiscal 2013 budget allocations

13  
00:00:22,900 --> 00:00:24,640

at a town hall with employees

14

00:00:26,120 --> 00:00:27,820

and then participated in groundbreaking

15

00:00:27,830 --> 00:00:29,220

ceremonies for Dryden's new

16

00:00:29,220 --> 00:00:30,880

Facilities Support Center.

17

00:00:30,880 --> 00:00:31,700

Please help me welcome

18

00:00:31,700 --> 00:00:34,580

Major General US Marine Corps Charlie Bolden

19

00:00:35,160 --> 00:00:36,440

The following morning, Bolden

20

00:00:36,440 --> 00:00:38,080

outlined NASA's future course

21

00:00:38,080 --> 00:00:40,550

in space exploration, and scientific discovery

22

00:00:40,550 --> 00:00:42,900

before the Antelope Valley Board of  
Trade's

23

00:00:42,900 --> 00:00:44,420

business outlook conference in

24

00:00:44,420 --> 00:00:45,760

Lancaster California.

25

00:00:46,440 --> 00:00:50,380

At its core, NASA and its fiscal year 2013 budget

26  
00:00:50,820 --> 00:00:52,240  
are about American innovation

27  
00:00:52,240 --> 00:00:53,798  
and American ingenuity.

28  
00:00:54,620 --> 00:00:55,780  
We're about keeping the US

29  
00:00:55,789 --> 00:00:58,020  
the world leader in space exploration

30  
00:00:58,020 --> 00:00:59,989  
and showcasing our knack for solving

31  
00:00:59,989 --> 00:01:02,660  
problems and improving life here on Earth.

32  
00:01:03,540 --> 00:01:04,820  
It's going to be an amazing ride

33  
00:01:04,820 --> 00:01:08,700  
in California, in orbit around this  
planet

34  
00:01:09,280 --> 00:01:11,140  
and outward into the Solar System

35  
00:01:11,149 --> 00:01:12,460  
and beyond.

36  
00:01:12,460 --> 00:01:15,460  
The future is literally happening right now,

37  
00:01:15,860 --> 00:01:18,240  
Bolden stressed that NASA Dryden continues

38  
00:01:18,240 --> 00:01:20,260  
to be a major contributor to the Antelope Valley's

39  
00:01:20,270 --> 00:01:23,220  
economic vitality and expressed his appreciation
