

1
00:00:03,000 --> 00:00:04,980
The orbiter is lifted some 60 feet

2
00:00:04,980 --> 00:00:07,320
into the air by the MDD sling.

3
00:00:08,160 --> 00:00:10,940
The SCA, a modified 747,

4
00:00:10,940 --> 00:00:12,560
is then towed to the MDD

5
00:00:12,560 --> 00:00:14,740
and carefully positioned underneath.

6
00:00:17,640 --> 00:00:18,940
The shuttle is now lowered

7
00:00:18,940 --> 00:00:22,020
onto three attach points on the 747.

8
00:00:22,800 --> 00:00:25,860
Once this slow exacting process is complete,

9
00:00:26,720 --> 00:00:28,280
the sling is removed from the orbiter and
