

1  
00:00:11,540 --> 00:00:12,780  
Okay.

2  
00:00:12,780 --> 00:00:14,240  
It's about to move.

3  
00:00:14,240 --> 00:00:15,360  
Ready?

4  
00:00:15,360 --> 00:00:16,600  
Yup.

5  
00:00:28,860 --> 00:00:31,440  
I'm fine tuning it now.

6  
00:00:31,440 --> 00:00:34,900  
The band does not do to much.

7  
00:00:36,360 --> 00:00:42,100  
Resolution to full, then press the play button...Alright  
let's do that.

8  
00:00:49,220 --> 00:00:52,280  
NASA Ground Cobra 07 passing 12,000.

9  
00:00:52,280 --> 00:00:56,260  
NASA Ground copies 12,000 and we are ready  
for you on the ground.

10  
00:00:56,380 --> 00:00:58,000  
Are you guys ready?

11  
00:01:06,100 --> 00:01:09,270  
First pass.

12  
00:01:09,270 --> 00:01:12,450  
You armed?

13  
00:01:12,450 --> 00:01:17,240  
NASA Ground copies five to six minutes out  
and we are ready.

14  
00:01:20,560 --> 00:01:23,720  
If I can see him, he's under a minute.

15  
00:01:32,980 --> 00:01:34,300  
Okay, I see him.

16  
00:01:34,420 --> 00:01:34,920  
You do?

17  
00:01:35,080 --> 00:01:35,580  
Yup.

18  
00:01:35,820 --> 00:01:36,820  
Fifteen seconds.

19  
00:01:37,520 --> 00:01:38,520  
Copy fifteen seconds.

20  
00:01:38,880 --> 00:01:39,880  
He's coming up.

21  
00:01:40,140 --> 00:01:42,720  
He's black on white, approaching the sun.

22  
00:01:43,840 --> 00:01:47,580  
Going through the discoloration right now.

23  
00:01:48,820 --> 00:01:50,400  
Three...

24  
00:01:50,420 --> 00:01:52,780  
Two...One...Time.

25

00:01:54,760 --> 00:01:57,120  
Copy.

26  
00:01:57,120 --> 00:01:58,900  
Everything worked.

27  
00:01:58,980 --> 00:02:02,760  
Do you want to do that again or do you want  
to go down to

28  
00:02:02,980 --> 00:02:04,140  
fifteen.

29  
00:02:04,740 --> 00:02:05,880  
What?

30  
00:02:07,120 --> 00:02:08,280  
Okay.

31  
00:02:09,340 --> 00:02:12,920  
Mine is negative 475.

32  
00:02:13,240 --> 00:02:17,100  
I think they got that on all three because  
we're so close.

33  
00:02:17,580 --> 00:02:19,659  
Are you right through the center of the sun.

34  
00:02:19,659 --> 00:02:22,959  
Do you want to go lower?

35  
00:02:22,959 --> 00:02:25,269  
I'm one wing span off of center.

36  
00:02:25,269 --> 00:02:26,269  
Okay, that's good.

37

00:02:26,269 --> 00:02:27,680

Do you want to go lower?

38

00:02:27,680 --> 00:02:31,719

Should I tell them yours or my frame?

39

00:02:31,719 --> 00:02:34,019

Got it?

40

00:02:34,019 --> 00:02:35,019

NASA Seven.

41

00:02:35,020 --> 00:02:37,240

NASA Ground.

42

00:02:37,240 --> 00:02:41,900

Cobra Zero Seven you went right through the center of the sun on our center camera.

43

00:02:41,920 --> 00:02:42,919

Great job.

44

00:02:42,920 --> 00:02:47,260

Will go down to 15,000 feet for the next pass and we're ready to copy parameters.

45

00:02:47,560 --> 00:02:49,580

Copy that, stand bye.
