1
00:00:01,060 --> 00:00:07,140
[Music]

2
00:00:09,280 --> 00:00:15,490
>>NASA has partnered with three companies; Bell,
PAE-ISR, and General Atomics for its Systems

3
00:00:15,490 --> 00:00:19,760
Integration and Operationalization demonstration.

4
00:00:21,420 --> 00:00:27,660
SIO is part of the UAS in the NAS project,
which will test policies and operational procedures,

5
00:00:27,660 --> 00:00:31,970
providing critical information to the FAA
as they continue to develop a pathway toward

6
00:00:31,970 --> 00:00:36,740
integrating unmanned systems into the national
airspace.

7
00:00:39,490 --> 00:00:44,860
The Bell UAV is a small autonomous pod transport
that will provide medical supply delivery

8
00:00:44,860 --> 00:00:47,920
in urban areas.

9
00:00:50,500 --> 00:00:56,000
PAE-ISR is conducting infrastructure inspection
flight tests under VFR using the Resolute

10
00:00:56,000 --> 00:01:02,020
Eagle UAS with detect and avoid technologies.

11
00:01:05,390 --> 00:01:11,200
The SkyGuardian remotely piloted aircraft
by General Atomics ASI is a long-range UAS

12
00:01:11,200 --> 00:01:16,460
that conducts critical infrastructure inspections
in IFR airspace.
