EPISODE 4:

TO BE TAUGHT, IF FORTUNATE

LUCAS MIX, RIKA
ANDERSON, & BECKY
CHAMBERS

1
00:00:04,470 --> 00:00:02,470
astrobiology really asks the the deepest

2
00:00:06,389 --> 00:00:04,480
questions that humanity can ask itself

3
00:00:09,030 --> 00:00:06,399
we're trying to understand

4
00:00:10,790 --> 00:00:09,040
who we are where we come from and

5
00:00:12,310 --> 00:00:10,800
whether we're alone in this universe and

6
00:00:14,390 --> 00:00:12,320
that's what really attracted me to the

7
00:00:16,470 --> 00:00:14,400
field in the first place and

8
00:00:17,990 --> 00:00:16,480
we can't get there we can't really

9
00:00:20,390 --> 00:00:18,000
wrestle with these scientific questions

10
00:00:23,109 --> 00:00:20,400
unless we bring in the humanities if we

11
00:00:26,150 --> 00:00:23,119
can we have to be able to understand

12
00:00:28,230 --> 00:00:26,160
our own history as humans we have to be

13
00:00:29,269 --> 00:00:28,240

able to put together the science that

14

00:00:32,549 --> 00:00:29,279

we're doing

15

00:00:34,630 --> 00:00:32,559

with the philosophy and the sociology

16

00:00:36,069 --> 00:00:34,640

and the arts to really put everything

17

00:00:37,350 --> 00:00:36,079

that we're learning about ourselves the
