

ASTROBIOLOGY at NASA
LIFE IN THE UNIVERSE

with a particular slab of
rocks, when I

#AskAstr🌍Bio

1
00:00:03,949 --> 00:00:02,570
Larry Ryan on Twitter has asked what

2
00:00:06,349 --> 00:00:03,959
you're you're most revealing or maybe

3
00:00:09,110 --> 00:00:06,359
favorite Discovery has been so far one

4
00:00:11,990 --> 00:00:09,120
of my most favorite moments was

5
00:00:13,610 --> 00:00:12,000
um actually I had two different fossils

6
00:00:16,550 --> 00:00:13,620
that I was trying to figure out and I

7
00:00:18,410 --> 00:00:16,560
just didn't understand them um and and

8
00:00:20,689 --> 00:00:18,420
literally having a light bulb moment

9
00:00:22,670 --> 00:00:20,699
with a particular slab of rocks when I

10
00:00:25,310 --> 00:00:22,680
could put them together and realized one

11
00:00:26,810 --> 00:00:25,320
was the hold fast of the other

12
00:00:28,250 --> 00:00:26,820
um so you know the sort of root of the

13
00:00:31,790 --> 00:00:28,260

other and this ultimately became

14

00:00:33,590 --> 00:00:31,800

phenicia that was really a fun literal

15

00:00:35,270 --> 00:00:33,600

light bulb moment of oh my gosh these
