

1
00:00:04,880 --> 00:00:01,910
oh yeah I was proud of the fact that we

2
00:00:06,230 --> 00:00:04,890
had the Nike Oh NACA laboratories you

3
00:00:08,839 --> 00:00:06,240
know were set up different parts of

4
00:00:11,870 --> 00:00:08,849
country it was ice proud we had that one

5
00:00:15,110 --> 00:00:11,880
in Cleveland and it was doing some of

6
00:00:17,870 --> 00:00:15,120
the foremost work as people who work

7
00:00:21,380 --> 00:00:17,880
there are well aware so far most work

8
00:00:22,939 --> 00:00:21,390
and research and you know every every

9
00:00:26,779 --> 00:00:22,949
bit of progress that people have ever

10
00:00:30,259 --> 00:00:26,789
made in any field other spacer your

11
00:00:32,170 --> 00:00:30,269
likes or any other field every bit of

12
00:00:34,729 --> 00:00:32,180
progress that were made it because

13
00:00:36,620 --> 00:00:34,739

someone was curious about whether we

14

00:00:39,200 --> 00:00:36,630

could do things in a new way or a better

15

00:00:41,900 --> 00:00:39,210

way but could we fill in these blanks of

16

00:00:45,290 --> 00:00:41,910

information and that was the role at

17

00:00:47,799 --> 00:00:45,300

NACA played and then that became when an

18

00:00:50,420 --> 00:00:47,809

AC because na CA B team part of NASA

19

00:00:51,970 --> 00:00:50,430

that's a role in NASA displayed since

20

00:00:55,100 --> 00:00:51,980

then still in their colleagues in

21

00:00:58,939 --> 00:00:55,110

broadening their base into the space

22

00:01:02,599 --> 00:00:58,949

program as well and that kind of

23

00:01:06,380 --> 00:01:02,609

research still is so important for our

24

00:01:10,450 --> 00:01:06,390

country because to me the nation that

25

00:01:13,490 --> 00:01:10,460

has led and that in any kind of research

26

00:01:15,530 --> 00:01:13,500

and along with that has had a good

27

00:01:18,890 --> 00:01:15,540

education system for all their people

28

00:01:24,320 --> 00:01:18,900

that's what enables us to develop whole

29

00:01:26,060 --> 00:01:24,330

new industries like aviation or for you

30

00:01:27,890 --> 00:01:26,070

know how you make steel or anything else

31

00:01:29,920 --> 00:01:27,900

somebody has to be curious about how you

32

00:01:33,260 --> 00:01:29,930

do this in a do in different way and

33

00:01:35,300 --> 00:01:33,270

that's what the that's what NASA that
