

1
00:00:01,236 --> 00:00:02,006
Good afternoon!

2
00:00:02,556 --> 00:00:03,446
I'm Charlie Bolden.

3
00:00:04,096 --> 00:00:07,796
Today is a special
day, a day when I,

4
00:00:07,796 --> 00:00:11,216
on behalf of the entire
agency, have the privilege

5
00:00:11,216 --> 00:00:14,526
of congratulating you
on the 75th anniversary

6
00:00:14,526 --> 00:00:15,866
of your center's groundbreaking.

7
00:00:16,756 --> 00:00:19,616
NASA Glenn is one of
our agency's oldest

8
00:00:19,616 --> 00:00:21,066
and most accomplished centers,

9
00:00:21,606 --> 00:00:23,376
serving the nation's
aeronautics,

10
00:00:23,376 --> 00:00:24,876
and space exploration research

11
00:00:24,876 --> 00:00:27,946
and development needs
since 1941.

12

00:00:28,906 --> 00:00:32,336

It's a legacy for which
you have much to be proud!

13

00:00:33,156 --> 00:00:35,966

The technological
contributions your center made

14

00:00:35,966 --> 00:00:39,366

in those early years helped
lead the nation to victory

15

00:00:39,366 --> 00:00:42,976

in World War II and,
later, helped pave the way

16

00:00:42,976 --> 00:00:45,276

for our nation's first
journeys into space.

17

00:00:46,246 --> 00:00:49,656

Today, NASA Glenn remains
a premier aeronautics

18

00:00:49,656 --> 00:00:50,446

research center.

19

00:00:51,066 --> 00:00:54,906

But 75 years later, your
center is not only developing

20

00:00:54,906 --> 00:00:57,246

technologies that are
sustaining our leadership

21

00:00:57,246 --> 00:00:58,416

in air transportation --

22

00:00:59,146 --> 00:01:01,416

its developing cutting-edge
technologies

23

00:01:01,746 --> 00:01:04,076

that are helping our nation
sustain its leadership

24

00:01:04,316 --> 00:01:05,606

in space exploration.

25

00:01:06,536 --> 00:01:10,666

Even now Orion's European
Service Module is being

26

00:01:10,666 --> 00:01:13,516

supported by the incredible
testing capabilities

27

00:01:13,816 --> 00:01:17,186

of Glenn's Space Power
Facility at Plum Brook Station.

28

00:01:18,226 --> 00:01:22,836

The future of space travel is
upon us and, once again, the men

29

00:01:22,836 --> 00:01:25,176

and women of NASA
Glenn have stepped

30

00:01:25,176 --> 00:01:27,206

up to help write
this next chapter.

31

00:01:28,066 --> 00:01:31,496

Let there be no doubt;
the contributions each

32

00:01:31,496 --> 00:01:35,346

of you make every day are

helping us to live better

33

00:01:35,346 --> 00:01:37,326
on Earth as well as in space.

34

00:01:38,026 --> 00:01:41,586
Today, as you celebrate
this milestone anniversary,

35

00:01:42,006 --> 00:01:44,436
think about all that your
center has accomplished

36

00:01:44,436 --> 00:01:46,526
in the past seven
and a half decades.

37

00:01:47,256 --> 00:01:49,296
Think about how much
better the world is

38

00:01:49,626 --> 00:01:52,296
because of your center's
technological accomplishments.

39

00:01:52,886 --> 00:01:55,686
Think of all that you will
accomplish in the future.

40

00:01:56,246 --> 00:02:01,176
To Jim Free, his management
team, and all the men and women

41

00:02:01,176 --> 00:02:06,166
of NASA Glenn: Congratulations
on 75 years of service

42

00:02:06,166 --> 00:02:09,386
to the NACA, NASA
and the nation!

43

00:02:10,156 --> 00:02:14,976

You have my personal thanks
for a job very well done!

44

00:02:15,046 --> 00:02:17,046

And, here's to the next 75 years

45

00:02:17,316 --> 00:02:20,086

of NASA Glenn's incredible
achievements
