

1
00:00:00,036 --> 00:00:01,246
Well, I just heard about it.

2
00:00:01,246 --> 00:00:04,586
And I didn't know anything
about it in advance.

3
00:00:05,516 --> 00:00:08,626
To me that had always been
Lewis lab in Cleveland

4
00:00:08,626 --> 00:00:10,876
with its original
name, of course, but --

5
00:00:11,506 --> 00:00:14,126
and it was a great honor
to me to have something

6
00:00:14,126 --> 00:00:15,596
like that named after me.

7
00:00:15,736 --> 00:00:18,006
And it's something
that I've been involved

8
00:00:18,006 --> 00:00:19,856
with through the years.

9
00:00:19,856 --> 00:00:24,196
And then oh, I visited the --

10
00:00:24,196 --> 00:00:27,876
what is now the Glenn
Research Center,

11
00:00:28,646 --> 00:00:30,176
replacing the old Lewis lab.

12

00:00:30,176 --> 00:00:32,936

I visited there many
times when I was in --

13

00:00:32,936 --> 00:00:35,966

I was in the Senate for
24 years, and I many,

14

00:00:35,966 --> 00:00:38,896

many times visited there
because I wanted to keep

15

00:00:38,896 --> 00:00:43,016

up with what the advances were,
the scientific advances were

16

00:00:43,016 --> 00:00:44,846

that were coming from there.

17

00:00:45,866 --> 00:00:50,056

And oh, things like
electrical energy storage.

18

00:00:50,886 --> 00:00:53,336

And the things like that
are so important still

19

00:00:53,336 --> 00:00:54,586

for the future of this country.

20

00:00:56,046 --> 00:00:57,106

Oh, that was a lot of fun.

21

00:00:57,106 --> 00:00:58,426

I really enjoyed that up there.

22

00:00:58,426 --> 00:01:00,976

And we had a lot
of people involved

23

00:01:01,026 --> 00:01:03,326
and a lot of celebration.

24

00:01:03,636 --> 00:01:08,406
And I was glad from a
different standpoint too,

25

00:01:08,446 --> 00:01:13,356
quite apart from whether
my name was on the building

26

00:01:13,356 --> 00:01:15,876
or it was associated with
it, I was proud of the fact

27

00:01:15,876 --> 00:01:19,436
that we were calling attention
to some of these advances

28

00:01:20,626 --> 00:01:24,166
in the -- in research and
engineering that had come

29

00:01:24,836 --> 00:01:28,526
from that center and which
make a big difference

30

00:01:28,526 --> 00:01:29,236
for our country.

31

00:01:30,056 --> 00:01:33,416
And the fact that my name was
going to be connected with that,

32

00:01:33,476 --> 00:01:35,656
I was particularly
proud of that.

33

00:01:36,306 --> 00:01:39,796

But the main benefit wasn't just
that my name was going to be on,

34

00:01:39,796 --> 00:01:43,616

the main benefit is it's good
for the country and that kind

35

00:01:43,616 --> 00:01:49,026

of research, and looking forward
to the future and about space

36

00:01:49,026 --> 00:01:51,866

or other things that
may get involved with,

37

00:01:51,866 --> 00:01:54,306

like energy storage and things
like that, that are going
