

Women@Glenn 60 Seconds for the 60th

60
NASA

1
00:00:01,476 --> 00:00:04,466
>> I'm the license manager in
the Technology Transfer Office

2
00:00:04,466 --> 00:00:06,176
at NASA Glenn Research Center.

3
00:00:06,696 --> 00:00:09,086
I oversee licensing
activities for the center.

4
00:00:09,556 --> 00:00:12,786
I also oversee a portfolio
of intellectual property

5
00:00:12,786 --> 00:00:13,806
and materials and coatings.

6
00:00:14,816 --> 00:00:18,076
What I enjoy most about my job
is working with NASA's inventors

7
00:00:18,216 --> 00:00:20,966
to translate their research
into useful products

8
00:00:21,056 --> 00:00:22,136
that can benefit everyone.

9
00:00:22,776 --> 00:00:25,706
Such as the shape memory alloy
work conducted here in this lab.

10
00:00:26,386 --> 00:00:28,146
I think I'd like my legacy to be

11
00:00:28,206 --> 00:00:29,686
to leave things better
than they were.

12

00:00:29,686 --> 00:00:32,746

And we should always strive
towards improving ourselves.

13

00:00:32,916 --> 00:00:33,786

Our relationships.

14

00:00:34,096 --> 00:00:34,736

Our environment.

15

00:00:35,096 --> 00:00:35,696

Our surroundings.

16

00:00:36,436 --> 00:00:38,716

My advice to the next
generation would be

17

00:00:38,806 --> 00:00:40,646

to explore careers in STEM.

18

00:00:41,306 --> 00:00:44,406

STEM provides a great background
for just about anything

19

00:00:44,406 --> 00:00:45,616

that you want to pursue in life.

20

00:00:46,276 --> 00:00:49,486

From engineering, of course, and
all the stuff that goes with it.

21

00:00:50,026 --> 00:00:51,986

To sales and marketing
and commercialization.

22

00:00:51,986 --> 00:00:52,826

Like the stuff that I do.

23

00:00:52,876 --> 00:00:54,676

To even being a doctor.

24

00:00:54,756 --> 00:00:55,546

Or a lawyer.

25

00:00:55,936 --> 00:00:56,816

Or an astronaut.
