

1
00:00:02,046 --> 00:00:05,116
>> I work on hybrid electric
and electric propulsion systems.

2
00:00:05,216 --> 00:00:07,676
The whole goal of that work is

3
00:00:07,826 --> 00:00:11,266
to make air travel
more efficient

4
00:00:11,266 --> 00:00:13,666
and cleaner with less emissions.

5
00:00:13,996 --> 00:00:16,106
From small commuter
type vehicles

6
00:00:16,526 --> 00:00:20,906
to larger scale vehicles
that are going cross country,

7
00:00:20,906 --> 00:00:23,886
this makes them more affordable
and more accessible to everyone.

8
00:00:24,756 --> 00:00:28,166
What I enjoy most about
my job is I get to work

9
00:00:28,166 --> 00:00:30,376
with brilliant people that
inspire me to be better.

10
00:00:30,436 --> 00:00:34,596
And then just being able to
work on these advanced concepts.

11
00:00:34,646 --> 00:00:37,126

And be kind of on the
cutting edge of technology

12

00:00:37,126 --> 00:00:40,476

and see what our future in air
travel is going to be like.

13

00:00:40,736 --> 00:00:43,096

I'd really like to be
remembered as someone

14

00:00:43,216 --> 00:00:45,916

who is innovative
in their field.

15

00:00:46,286 --> 00:00:48,526

Someone who is determined

16

00:00:48,596 --> 00:00:50,396

to leave things better
than they found them.

17

00:00:50,996 --> 00:00:53,186

And then, finally, just
someone who's genuine

18

00:00:53,186 --> 00:00:55,216

in both their work
and their passion.
