1
00:00:03,286 --> 00:00:06,656
>> My branch does research and
develops sensors integrated

2
00:00:06,656 --> 00:00:12,516
with electronics to measure
temperature, pressure and gases

3
00:00:13,056 --> 00:00:17,046
that are going to be used
for future aeronautics

4
00:00:17,046 --> 00:00:18,656
and space missions for NASA.

5
00:00:19,316 --> 00:00:23,206
What I enjoy the most about my
job is learning about each one

6
00:00:23,206 --> 00:00:26,416
of my staff projects,
being an advocate for them

7
00:00:26,586 --> 00:00:29,486
so they could focus on their job
and develop their technology,

8
00:00:29,486 --> 00:00:31,066
their sensors and electronics.

9
00:00:31,456 --> 00:00:36,626
And also being a mentor and a
coach and seeing their successes

10
00:00:36,706 --> 00:00:38,936
and seeing how proud they are

11
00:00:38,936 --> 00:00:42,436
when their technology

becomes a reality.

12
00:00:42,756 --> 00:00:46,726
I would like to be remembered as
a person that did her job well,

13
00:00:47,216 --> 00:00:52,686
that was excited to work for
NASA, that kept my commitments
