

1
00:00:01,040 --> 00:00:02,719
So on behalf of the Cleveland Public

2
00:00:02,720 --> 00:00:04,318
Library, our board of

3
00:00:04,319 --> 00:00:07,599
trustees, and our staff, we want to wish

4
00:00:07,600 --> 00:00:10,799
NASA Glenn Research Center a happy 80th

5
00:00:10,800 --> 00:00:11,919
anniversary.

6
00:00:11,920 --> 00:00:13,999
NASA Glenn has been so supportive of the

7
00:00:14,000 --> 00:00:15,598
Cleveland Public Library, and we've been

8
00:00:15,599 --> 00:00:17,839
so lucky to be able to have great

9
00:00:17,840 --> 00:00:19,839
partnerships with you over the time. But

10
00:00:19,840 --> 00:00:21,919
I want to mention one that really sticks

11
00:00:21,920 --> 00:00:22,639
out for me.

12
00:00:22,640 --> 00:00:25,118
A couple of years back, right after the

13
00:00:25,119 --> 00:00:26,719

movie Hidden Figures came out

14

00:00:26,720 --> 00:00:28,399

we were able to bring Margo Lee

15

00:00:28,400 --> 00:00:29,999

Shetterly, the author of Hidden

16

00:00:30,000 --> 00:00:33,359

Figures to the library. Our folks at NASA

17

00:00:33,360 --> 00:00:35,039

Glenn partnered with us and

18

00:00:35,040 --> 00:00:37,599

brought us scientists, and actually an

19

00:00:37,600 --> 00:00:38,878

astronaut who was

20

00:00:38,879 --> 00:00:41,679

able to be on stage and answer questions

21

00:00:41,680 --> 00:00:42,959

for our young people,

22

00:00:42,960 --> 00:00:46,078

along with Margo Lee Shetterly. And I

23

00:00:46,079 --> 00:00:47,919

looked out at the audience and saw so

24

00:00:47,920 --> 00:00:49,679

many young girls who

25

00:00:49,680 --> 00:00:52,238

were just thinking about the opportunity

26

00:00:52,239 --> 00:00:54,799

for themselves to be involved

27

00:00:54,800 --> 00:00:57,519

as an astronaut or in the world of

28

00:00:57,520 --> 00:00:58,479

science,

29

00:00:58,480 --> 00:01:00,479

and I just thought this was such a

30

00:01:00,480 --> 00:01:01,999

great program that couldn't have been

31

00:01:02,000 --> 00:01:03,679

done without the help of NASA Glenn

32

00:01:03,680 --> 00:01:04,639

Research Center

33

00:01:04,640 --> 00:01:07,759

So with that said, happy anniversary NASA

34

00:01:07,760 --> 00:01:09,118

Glenn Research Center.

35

00:01:09,119 --> 00:01:11,999

We know those young girls, they are

36

00:01:12,000 --> 00:01:13,438

looking out to the stars
