

HOW WE FLY

1

00:00:02,560 --> 00:00:10,400

Whether it is traveling for work, or for vacations, or getting things delivered, aeronautics plays a

2

00:00:10,400 --> 00:00:15,680

role in that. And so one of the things we're looking at is called advanced air mobility.

3

00:00:15,680 --> 00:00:22,640

That is an air taxi that would be able to commute. The idea is from like a rooftop downtown into a

4

00:00:22,640 --> 00:00:28,640

neighboring suburb, or to the airport. And be able to reduce your commute time, as well as

5

00:00:28,640 --> 00:00:35,040

do it fully on battery power. In addition to that, we're developing some new technologies for hybrid

6

00:00:35,040 --> 00:00:40,560

electric turbo fan engines. So with that you can sort of think of it almost like your hybrid

7

00:00:40,560 --> 00:00:46,960

electric cars, but for large commercial vehicles. So one of the key things that we could see coming

8

00:00:46,960 --> 00:00:53,120

out of this is a substantial reduction in the amount of noise, and a significant reduction in the
