

Dr. Kiao Wen

1  
00:00:15,190 --> 00:00:12,230  
the major driving force of this earth

2  
00:00:18,550 --> 00:00:15,200  
system would be sang the sound is the

3  
00:00:21,109 --> 00:00:18,560  
only energy source that we receive

4  
00:00:23,189 --> 00:00:21,119  
however the sound is relatively constant

5  
00:00:25,429 --> 00:00:23,199  
through our time what is changing the

6  
00:00:28,070 --> 00:00:25,439  
most is the earth's surface and the

7  
00:00:31,589 --> 00:00:28,080  
atmosphere constitutes

8  
00:00:33,830 --> 00:00:31,599  
clouds is my specialty here and clouds

9  
00:00:36,389 --> 00:00:33,840  
are actually the heat engine of the

10  
00:00:37,990 --> 00:00:36,399  
earth's circulation they provide the

11  
00:00:40,389 --> 00:00:38,000  
heat that drives the whole global

12  
00:00:41,190 --> 00:00:40,399  
circulation if we send pollution in the

13  
00:00:43,430 --> 00:00:41,200

air

14

00:00:44,549 --> 00:00:43,440

that will change the reflectance of the

15

00:00:46,950 --> 00:00:44,559

clouds

16

00:00:49,670 --> 00:00:46,960

which will be brighter and reflect more

17

00:00:51,590 --> 00:00:49,680

of the sunlight back into the space that
