

POSSIBL

1  
00:00:04,820 --> 00:00:02,360  
I know it might sound a little bit

2  
00:00:07,100 --> 00:00:04,830  
sci-fi but could you imagine if we could

3  
00:00:09,920 --> 00:00:07,110  
harness the power of a solar storm as it

4  
00:00:12,200 --> 00:00:09,930  
sweeps past our small planet if we could

5  
00:00:14,120 --> 00:00:12,210  
capture that energy we could supply our

6  
00:00:16,730 --> 00:00:14,130  
energy i'd like to learn about the sun

7  
00:00:20,330 --> 00:00:16,740  
is that will ever blow up for Josh

8  
00:00:23,210 --> 00:00:20,340  
magnetism spectra systems cycles all

9  
00:00:25,070 --> 00:00:23,220  
different things using the Sun really

10  
00:00:27,019 --> 00:00:25,080  
very important aspect of space weather

11  
00:00:29,390 --> 00:00:27,029  
because as we become more and more

12  
00:00:31,609 --> 00:00:29,400  
technologically advanced our satellite

13  
00:00:33,940 --> 00:00:31,619

blue thing about sunspots is somewhat

14

00:00:36,049 --> 00:00:33,950

cooler than the surface of the Sun and
