

COMPLE

1
00:00:06,360 --> 00:00:03,570
for example a comet is is the comet's

2
00:00:08,669 --> 00:00:06,370
tail is just the solar wind going over

3
00:00:10,980 --> 00:00:08,679
this icy body stripping off particles

4
00:00:14,310 --> 00:00:10,990
ionizing the particles of and they're

5
00:00:15,930 --> 00:00:14,320
glowing in there no it looks really big

6
00:00:17,519 --> 00:00:15,940
it is actually a small star actually

7
00:00:20,279 --> 00:00:17,529
made out of an old large refrigerator

8
00:00:23,040 --> 00:00:20,289
box so my two friends and I got inside

9
00:00:24,390 --> 00:00:23,050
the box to actually view the Eclipse and

10
00:00:26,370 --> 00:00:24,400
I really wish somebody had a camera

11
00:00:29,730 --> 00:00:26,380
thing about a sign is the fact that it

12
00:00:31,470 --> 00:00:29,740
has a win actually plasma that comes off

13
00:00:33,780 --> 00:00:31,480

the surface of the Sun that's flowing

14

00:00:36,630 --> 00:00:33,790

towards the Earth rotates uniform The

15

00:00:39,330 --> 00:00:36,640

Sun has a differential rotation imagine

16

00:00:41,340 --> 00:00:39,340

the valley moving and the nose refuses

17

00:00:43,260 --> 00:00:41,350

to move and that's what great about the

18

00:00:45,299 --> 00:00:43,270

fresh is that it is one of the primary
