

SOLAR DYNAMICS OBSERVATORY

OBSERVATORY

1
00:00:00,010 --> 00:00:04,050

<> Narrator: Welcome

2
00:00:04,050 --> 00:00:08,100

to the Sun. Though it doesn't seem to change too much to our eyes, it's

3
00:00:08,100 --> 00:00:12,140

a lot more active than it looks. That's why NASA's launching the Solar Dynamics

4
00:00:12,140 --> 00:00:16,160

Observatory--our newest eye on the Sun. With images

5
00:00:16,160 --> 00:00:20,170

ten times bigger than HDTV, a massive amount of

6
00:00:20,170 --> 00:00:24,230

data, and the unique ability to see movement inside the Sun,

7
00:00:24,230 --> 00:00:28,280

we'll be taking an unprecedented look at how the Sun...

8
00:00:28,280 --> 00:00:32,310

affects us. <>
