

CO₂

1
00:00:00,000 --> 00:00:04,160
[music]

2
00:00:04,180 --> 00:00:08,350
2000 - 2009.

3
00:00:08,370 --> 00:00:12,510
It was the warmest decade on modern record.

4
00:00:12,530 --> 00:00:16,540
How do we know? It's what we do.

5
00:00:16,560 --> 00:00:20,550
NASA has missions monitoring climate. They're up there right now - gathering data,

6
00:00:20,570 --> 00:00:24,750
analyzing trends, and sharing both raw data

7
00:00:24,770 --> 00:00:28,940
and with results with everyone. For free.

8
00:00:28,960 --> 00:00:33,120
Why are temperatures rising? Why aren't changes the same everywhere?

9
00:00:33,140 --> 00:00:37,170
How are humans contributing to climate change? What changes are already occurring today?
