

1
00:00:15,980 --> 00:00:07,980

Music

2
00:00:16,000 --> 00:00:19,980

Kenji: So it's the fortieth anniversary of Earth Day, and I think what Bella Gaia

3
00:00:20,000 --> 00:00:23,980

offers is that, in order to care for

4
00:00:24,000 --> 00:00:27,980

something, whether it's your partner or the Earth, you have

5
00:00:28,000 --> 00:00:31,980

to have a relationship with it.

6
00:00:32,000 --> 00:00:35,980

Music

7
00:00:36,000 --> 00:00:39,980

So we don't have to explain. We can just

8
00:00:40,000 --> 00:00:43,980

show you how the Earth is alive. We can show you how it breathes,

9
00:00:44,000 --> 00:00:47,980

we can show you how human activity affects it all.

10
00:00:48,000 --> 00:00:51,980

Chris: --which has enabled us to see the changes in the sea ice extent,

11
00:00:52,000 --> 00:00:55,990

which impact the albedo of the Earth-
bergy bits are

12
00:00:56,010 --> 00:01:03,990

essentially the ice fragments that are shed away from a glacier's end.

13

00:01:04,010 --> 00:01:07,990

It can show you how humans and nature are connected, and in turn how art and science are

14

00:01:08,010 --> 00:01:11,990

connected as well.

Music

15

00:01:12,010 --> 00:01:15,990

It's an exploration of the relationship between human civilization

16

00:01:16,010 --> 00:01:19,990

and our ecosystem.
