

1  
00:00:12,500 --> 00:00:04,150  
Music

2  
00:00:12,520 --> 00:00:16,680  
Christine Redmond. I'm from Brighton, Michigan, and I'm currently studying aerospace engineering

3  
00:00:16,700 --> 00:00:20,850  
at Georgia Tech. And I'm an intern here at Goddard in the Advanced Manufacturing Branch.

4  
00:00:20,870 --> 00:00:25,010  
The work environment in the Advanced Manufacturing Branch

5  
00:00:25,030 --> 00:00:29,140  
is really busy, and it's a really dynamic place to work.

6  
00:00:29,160 --> 00:00:33,280  
I really like the work I'm doing with the electrohydrodynamic

7  
00:00:33,300 --> 00:00:37,390  
pump because I really get to put my engineering knowledge

8  
00:00:37,410 --> 00:00:41,530  
to work. And just seeing things come together and knowing that

9  
00:00:41,550 --> 00:00:45,600  
it's going to be flown on the Vomit Comet so it's a good way of testing

10  
00:00:45,620 --> 00:00:49,660  
to make sure that our pump will since we can't actually test it

11  
00:00:49,680 --> 00:00:53,700  
in space yet. Well, my ultimate goal to work here at Goddard

12  
00:00:53,720 --> 00:00:57,870  
so just being here as an intern, seeing how things work.

13  
00:00:57,890 --> 00:01:02,040

Now that I'm here in my third summer, it's a lot different

14

00:01:02,060 --> 00:01:06,220

because I know who to go to to ask questions if I need help with something

15

00:01:06,240 --> 00:01:10,400

I know how things get done. So it really put me in a leadership position for the other

16

00:01:10,420 --> 00:01:14,580

interns. If they have questions, I usually know who to go to to talk to.
