

1
00:00:08,080 --> 00:00:04,030

[Music]

2
00:00:08,100 --> 00:00:12,120

Candace: The Dual Precipitation Radar, or DPR,

3
00:00:12,140 --> 00:00:16,170

made its way here from Japan. It was built by a company called

4
00:00:16,190 --> 00:00:20,190

NTSpace working for JAXA, the Japanese Space Agency.

5
00:00:20,210 --> 00:00:24,210

[Natural sound]

6
00:00:28,250 --> 00:00:32,240

Art: The radars once they arrive here, they go through some

7
00:00:32,260 --> 00:00:36,280

processing, make sure during the shipment there was no damage done to

8
00:00:36,300 --> 00:00:40,330

the radars, even though we do have shock monitors on the boxes that we make sure there

9
00:00:40,350 --> 00:00:44,370

was no unexpected

10
00:00:44,390 --> 00:00:48,410

incidents happened during the transportation

11
00:00:48,430 --> 00:00:52,440

However, in spite of that, we still go through

12
00:00:52,460 --> 00:00:56,470

processing in house here, that we check, make sure functionally

13
00:00:56,490 --> 00:01:00,480

they're still working properly before they hand it over

14

00:01:00,500 --> 00:01:04,500

to NASA.

[Natural sound, music]
