

1  
00:00:08,150 --> 00:00:04,040

A hot, dry climate is fueling intense wildfires so far in 2016.

2  
00:00:16,220 --> 00:00:12,170

From the perspective of space, NASA scientists see the pattern of wildfire around the globe

3  
00:00:28,510 --> 00:00:20,300

and seek to understand links between fire, climate and land management in the US and beyond.

4  
00:00:36,800 --> 00:00:32,640

El Nino diverted rainfall for months, and the southern Amazon is now the driest it's been in 14 years.

5  
00:00:45,150 --> 00:00:40,970

The lack of groundwater in the area forecasts a very active fire season.
