

Hurricane Matthew – October 2, 2016

1
00:00:00,000 --> 00:00:06,039

NASA has a satellite, the Global Precipitation Measurement (GPM) core observatory that can see inside storm

2
00:00:06,039 --> 00:00:10,477

Matthew intensified from a Category 1 to a Category 5 storm in 24 hours.

3
00:00:10,477 --> 00:00:18,485

The image we see here is from October 2 where Hurricane Matthew was a Category 4 storm, and you can actu

4
00:00:18,485 --> 00:00:29,496

to look at how the strong convection is causing the storm to intensify as well as the extensive rain bands that a

5
00:00:29,496 --> 00:00:34,701

which caused extensive rainfall and flooding in Hispaniola as it progressed northward.
