

1
00:00:00,070 --> 00:00:04,130
[music] Coming soon to an orbit above you ...

2
00:00:12,260 --> 00:00:16,340
satellites so small you can hold them in your hand

3
00:00:20,410 --> 00:00:24,440
and featuring:

4
00:00:24,460 --> 00:00:28,560
next generation technology

5
00:00:28,580 --> 00:00:32,610
low cost

6
00:00:32,630 --> 00:00:36,700
and rapid development.

7
00:00:40,870 --> 00:00:44,990
They're now ready to do real science

8
00:00:45,010 --> 00:00:49,100
studying hurricanes,

9
00:00:49,120 --> 00:00:53,270
Earth's energy budget, weather, dust particles,

10
00:00:53,290 --> 00:00:57,390
and climate.

11
00:01:01,500 --> 00:01:05,550
They won't replace larger satellites,

12
00:01:05,570 --> 00:01:09,690
designed to last for years,

13
00:01:09,710 --> 00:01:13,780

and carry multiple instruments,

14

00:01:13,800 --> 00:01:17,970

but they are already fostering innovation

15

00:01:17,990 --> 00:01:22,020

and capturing the best ideas of scientists and even students.

16

00:01:22,040 --> 00:01:26,180

[music builds]
